ABOUT ME

Experienced Software Developer with 5+ years of experience designing, building, and launching scalable web applications. Skilled in APIs, performance optimization, and CI/CD pipelines. Strong communicator with mentoring experience, and recently focused on cloud-native architecture and production ML pipelines.

WORK EXPERIENCE

Alive Hire
Resume Optimization Platform — May 2025 – Present

- Led a team of 4 developers building a resume optimization platform.
- Designed backend services (Python/FastAPI) and automated ETL pipelines.
- Improved API response times by 30%.

Freelance
Independent Projects — Feb 2025 – Present

- Delivered full-stack solutions (auth, chat, Kanban, AWS).
- Implemented CI/CD pipelines for reliability.

PROJECTS

AudioHub
E-commerce platform with recommendation engine boosting conversions ~45%.

BookSphere
Library management system (MERN), QR check-in/out, ISBN scanning, analytics.
